

Vision of UTM

To be recognized as a world class centre of academic and technological excellence.

Mission of UTM

To be a leader in the development of human capital and innovative technologies that will contribute to the nation's wealth creation.

Vision of the Faculty

FBME is committed to be a world-class centre of excellence and a leader in teaching, learning and research in the field of biosciences and medical engineering.

Missions of the Faculty

M1: produce graduates with high ethical values and good professional conduct who are competent in the fields of biosciences and medical engineering.

M2: To spearhead advances in the fields of biosciences and medical engineering through multidisciplinary research, integrated learning, and global networking.

M3: To fulfill the needs of all stakeholders in producing graduates that contributes towards nation building, wealth creation and sustainable development. To be recognized as a world class centre of academic and technological excellence.

PEO 1

Equip graduates with sufficient knowledge in biomedical engineering and possess the necessary skills for work in the industry.

PEO 2

Provide graduates with a solid foundation in biomedical engineering to achieve competitive and/or leadership positions or to pursue advanced studies in biomedical engineering or their chosen field of interest.

PEO 3

Shall continue to develop professionally through both practical experienced and life-long learning.

PEO 4

Prepare graduates for personal and professional success with awareness and commitment to their ethical and social responsibilities, both as individuals and in team environment.
